

BHU LAN Network Connectivity User Guide For CentOS

STEP 1: AUTHENTICATE

1. Press Windows Key and search for Network. Click on Network.

2. Click On Gear icon as shown in picture below.

3. Click on Security Tab and configure as shown in picture below. Use your username and password and click Apply. This is the same username and password as you are using for BHU-WiFi/BHU-WiFi-Secure Connectivity.

NOTE:-

If user connecting their WIFI routers with the new LAN connection it will not work.
